MAY 30 2019

BOC-01-00837

**Subject : Treatment of Processed Engineered Fuel (PEF)  
Shipments**

**Date : 29 May 2019**

---

In addition to the usual import and other regulatory documents required, and regardless of the selectivity, all shipments declared as Processed Engineered Fuel (PEF) may only be processed and released after a certification/report by the DENR-EMB that the said shipment is **not hazardous and not prohibited** after undergoing physical examination and testing conducted by the latter together with BOC personnel.

Moreover, in case of doubt, the District/Port Collector concerned may require additional testing of the shipment, which may be provisionally released with continuous underguarding until such time that said shipment is said to have cleared the said tests and satisfied the requirements of the law/rules on the matter.

For immediate and strict compliance.
