CUSTOMS ADMINISTRATIVE ORDER
No. 4-2004

Subject: AMENDMENT TO CUSTOMS ADMINISTRATIVE ORDER 5-2001 (IMPLEMENTING REPUBLIC ACT 9135; AN ACT AMENDING CERTAIN PROVISIONS OF PRESIDENTIAL DECREE NO. 1464, OTHERWISE KNOWN AS THE TARIFF AND CUSTOMS CODE OF THE PHILIPPINES, AS AMENDED (CUSTOMS CODE), AND FOR OTHER PURPOSES).

By authority of Section 18 of Republic Act No. 9135, the following rules and regulations are hereby promulgated.

SEC. I. OBJECTIVES

- A. To enhance and consolidate the regulations concerning the WTO Valuation System, the objectives of which are:
1. To have a fair, uniform and neutral system for the valuation of goods for customs purposes that precludes the use of arbitrary or fictitious customs values;
 2. To recognize that the basis for valuation of goods for customs purposes should, to the greatest extent possible, be the transaction value of the goods being valued;
 3. To recognize that the customs value should be based on simple and equitable criteria consistent with commercial practices and that valuation procedures should be of general application without distinction between sources of supply; and
 4. To recognize that valuation procedures should not be used to combat dumping.
- B. To implement the recordkeeping and post-entry audit systems in order to facilitate importation and protect government revenue at the same time.

SEC. II. DUTIABLE VALUE

A. General

The dutiable value of imported goods shall be determined using one of the six methods of valuation listed below, to be applied sequentially in the order provided by law.

11-9-04

eAO - 4-07

B. Method 1 – The Transaction Value

1. The dutiable value for an imported article shall be the Transaction Value which is the price actually paid or payable for the goods when sold for export to the Philippines adjusted in accordance with the provisions of Section II.B.3 of this Order, and subject to the conditions specified in Section II.B.2 herein.
2. The dutiable value shall be the Transaction Value under method 1 if all of the following conditions are satisfied:
 - a. There must be a sale for export to the Philippines;
 - b. There must be no restrictions as to the disposition or use of the goods by the buyer, other than restrictions which:
 - 1) Are imposed or required by law or by Philippine authorities;
 - 2) Limit the geographical area in which the goods may be resold; or
 - 3) Do not substantially affect the value of the goods;
 - c. The sale or price must not be subject to some conditions or considerations for which a value cannot be determined with respect to the goods being valued;
 - d. No part of the proceeds of any subsequent resale, disposal or use of the goods by the buyer will accrue directly or indirectly to the seller, unless an appropriate adjustment can be made in accordance with the provisions of Section II.B.3 of this Order, and
 - e. The buyer and the seller are not related or where they are related, such relationship did not influence the price of the goods. The buyer and the seller shall be deemed to be related only if:
 - 1) they are officers or directors of one another's businesses;
 - 2) they are legally recognized partners in business;
 - 3) they are employer and employee;
 - 4) any person directly or indirectly owns, controls or holds 5% or more of the outstanding voting stock or shares of both of them;
 - 5) one of them directly or indirectly controls the other;

2AO-7-04

- 6) both of them are directly or indirectly controlled by a third person;
 - 7) together they directly or indirectly control a third person; or
 - 8) they are related by affinity or consanguinity up to the fourth civil degree;
- f. If the buyer and seller are related, the use of the transaction value method is acceptable if:
- 1) the circumstances surrounding the transaction demonstrate that the relationship did not influence the price actually paid or payable, or
 - 2) the transaction value closely approximates to one of the following test values occurring at or about the same time:
 - i) The transaction value in sales to unrelated buyers of identical goods or similar goods for export to the Philippines, or
 - ii) The deductive value of identical or similar goods determined in accordance with Method 4; or
 - iii) The computed value of identical or similar goods determined in accordance with Method 5.

In applying the foregoing tests, due account shall be taken of demonstrated differences in commercial levels, quantity levels, the elements enumerated in the immediately following paragraph 3 and costs incurred by the seller in sales in which the seller and the buyer are not related that are not incurred by the seller in sales in which the seller and the buyer are related.

If, in the light of information provided by the importer or otherwise, the Bureau has grounds for considering that the relationship influenced the price, it shall communicate its grounds to the importer and the importer shall be given a reasonable opportunity to respond. If the importer so requests, the communication of the grounds shall be in writing.

3. In determining the Transaction Value, the following adjustments shall be added to the price actually paid or payable for the imported goods being valued if such value has not been included in the price actually paid or payable:
- a. Commissions and brokerage fees (except buying commissions);
 - b. Cost of Containers which are treated as being one for Customs purposes with the goods in question;
 - c. Costs of packing whether for labor or materials;

- d. **Assists.** Assists is defined as the value, apportioned as appropriate, of certain goods and services supplied directly or indirectly by the buyer free of charge or at a reduced cost for use in connection with the production and sale for export of the imported goods, to the extent that such value has not been incorporated in the price actually paid or payable. They include:
- 1) Materials, components, parts and similar items incorporated in the imported goods;
 - 2) Tools, dies, moulds and similar items used in the production of the imported goods;
 - 3) Materials consumed in the production of the imported goods; and
 - 4) Engineering, development, artwork, design work, and plans undertaken elsewhere than in the Philippines and necessary for the production of the imported goods;
- e. Royalties and license fees related to the goods being valued;
- f. The value of any part of the proceeds of any subsequent resale, disposal or use of the imported goods that accrues directly or indirectly to the seller;
- g. The cost of transport of the imported goods to the port of entry in the Philippines;
- h. Loading, unloading and handling charges associated with the transport of the imported goods from the country of exportation to the port of entry in the Philippines; and
- i. The cost of insurance;
4. The dutiable value must not include the following charges or costs, if they are distinguished from the price actually paid or payable for the goods.
- a. Charges for construction, erection, assembly, maintenance or technical assistance, undertaken after importation on imported goods such as industrial plant, machinery or equipment;
 - b. Cost of transport after importation;
 - c. Duties and taxes of the Philippines; and
 - d. Other permissible deduction allowed under the WTO Valuation Agreement.
5. The importer shall pay adjustments to Transaction Value pertaining to Assists [Sec. II (B) (3) (d)], and Royalties/ license fees [Sec. II (B) (3) (e)] and the value of any part of the proceeds of any subsequent resale, disposal or use of the imported goods that accrues directly or indirectly to the seller [Sec. II (B) (3) (f)] within forty-five (45) days from the date of importation or forty-five (45) days from the time payment has been made.

C. Method 2 - The Transaction Value for Identical Goods

1. If the dutiable value of imported goods cannot be determined under the provisions of Section II B of this Order, the dutiable value shall be the transaction value of identical goods sold for export to the Philippines and exported at or about the same time as the goods being valued. The sale involving such identical goods must also be at the same commercial level and in substantially the same quantity as the goods being valued.
2. Definition of identical goods
 - a. Identical goods are defined as goods, which are:
 - 1) the same in all respects including:
 - i) physical characteristics,
 - ii) quality, and
 - iii) reputation;
 - 2) produced in the same country as the goods being valued, and
 - 3) produced by the producer of the goods being valued;
 - b. The definition of identical goods excludes imported goods for which engineering, development, artwork, design work, and plans and sketches is undertaken in the Philippines and is provided by the buyer to the producer of the goods free of charge or at a reduced cost;
 - c. Where there are no identical goods produced by the same person in the country of production of the goods being valued, identical goods produced by a different person in the same country may be taken into account;
 - d. Minor differences in appearance would not preclude goods which otherwise conform to the definition from being regarded as identical.
3. If no sale of identical goods at the same commercial level and in substantially the same quantity as the goods being valued is found, the transaction value of identical goods sold at a different commercial level and/or in different quantity may be utilized. Such transaction value of identical goods shall be adjusted upwards or downwards to account for demonstrated differences between the goods being valued and the identical goods, to take account of:
 - a. Commercial level differences;
 - b. Quantity differences; and
 - c. Significant differences for transportation costs due to variances in the mode and/or distance of transport.

4. If in applying Method 2, more than one transaction value of identical goods is found, the lowest of such value shall be used to determine the customs value of the imported goods.

D. Method 3 -- The Transaction Value of Similar Goods

1. If the dutiable value of imported goods cannot be determined under the preceding methods, the dutiable value shall be the transaction value of similar goods sold for export to the Philippines and exported at or about the same time as the goods being valued. The sale involving such similar goods must also be at the same commercial level and in substantially the same quantity as the goods being valued.
2. Definition of similar goods:
 - a. Similar goods are defined as goods which, although not alike in all respects,
 - 1) Have like characteristics and like component materials;
 - 2) Are capable of performing the same functions as the goods being valued;
 - 3) Are commercially interchangeable with the goods being valued;
 - 4) Are produced in the same country of the goods being valued; and
 - 5) Are produced by the producer of the goods being valued;
 - b. The definition of similar goods excludes imported goods for which engineering, development, artwork, design work, and plans and sketches is undertaken in the Philippines and is provided by the buyer to the producer of the goods free of charge or at a reduced cost;
 - c. Where there are no similar goods produced by the same person in the country of production of the goods being valued, similar goods produced by a different person in the same country may be taken into account.
3. Where no sale of similar goods at the same commercial level and substantially the same quantity as the goods being valued is found, similar goods at different commercial level and/or in different quantity may be utilized. Such transaction value of similar goods shall be adjusted upwards or downwards to account for demonstrated differences between the goods being valued and the similar goods, to take account of:
 - a. Commercial level differences;
 - b. Quantity differences; and

- c. Significant differences for transportation costs due to variances in the mode and/or distance of transport.
- 4. If in applying Method 3, more than one transaction value of similar goods is found, the lowest of such value shall be used to determine the customs value of the imported goods.
If the dutiable value still cannot be determined through the successive application of the two immediately preceding methods, the dutiable value shall be determined under Method Four or, when the dutiable value still cannot be determined under that method, under Method Five, except that at the request of the importer, the order of application of Methods Four and Five shall be reversed. Provided, however, that if the Commissioner of Customs deems that he will experience real difficulties in determining the dutiable value using Method Five, the Commissioner of Customs may refuse such a request in which event the dutiable value shall be determined under Method Four, if it can be so determined.

E. Method 4 – The Deductive Value

- 1. By this method, the dutiable value is determined on the basis of sales in the Philippines of the goods being valued or of identical or similar imported goods, less certain specified expenses resulting from the importation and sale of the goods.
- 2. The sales in the Philippines must meet the following conditions:
 - a. The imported goods or identical or similar imported goods have been sold in the Philippines in the same condition as imported;
 - b. Sales of the goods being valued or of identical or similar goods have taken place at or about the time of importation of the goods being valued;
 - c. If no sales took place at or about the time of importation, it is permitted to use sales of the imported goods or identical or similar imported goods, sold in the Philippines in the same condition as imported, at the earliest date after importation but before the expiration of 90 days after such importation;
 - d. If there are no sales of identical or similar imported goods in the condition as imported that meet all the above requirements, the importer may choose to use sales of the goods being valued after further processing;
 - e. The purchaser must not be related to the importer from whom he buys such goods;
 - f. The purchaser in the Philippines must not have supplied assists, either directly or indirectly;
 - g. The expression "at or about the same time", when applied to the deductive method, shall mean a period extending 45 days

2AD-4-04

prior to and 45 days following the importation of the goods being valued.

- 3 A deductible value is determined by making a deduction from the established price per unit for the aggregate of the following elements:
 - a. Commissions generally earned on a unit basis in connection with sales in the Philippines for goods of the same class or kind; or
 - b. Additions usually made for in connection with sales profit and general expenses in the Philippines for goods of the same class or kind; and
 - c. The usual transport, insurance and associated costs incurred within the Philippines, and
 - d. Customs duties and other national taxes payable in the Philippines by reason of the importation or sale of the goods.

F. Method 5 – The Computed Value

1. Under this method, the dutiable value is determined on the basis of the cost of production of the goods being valued, plus an amount for profit and general expenses usually reflected in sales from the country of exportation to the Philippines of goods of the same class or kind.
2. The Dutiable value may be calculated as follows:
 - a. Determine the aggregate of the relevant costs, charges and expenses or the value of:
 - 1) materials employed in producing the imported goods, and
 - 2) production or other processing costs for the imported goods (direct and indirect labor, factory overheads);
 - b. The following are to be added if not included in a 1) and a 2) above:
 - 1) Cost of Containers which are treated as being one for Customs purposes with the goods in question;
 - 2) Cost of packing whether for labor or materials;
 - 3) Assists (apportioned in a reasonable manner in accordance with generally accepted accounting principles);
 - 4) Engineering, development, artwork, design work, and plans and sketches undertaken in the Philippines and charged to the producer;

2A0-4.04

- c. Add amounts for profit and general expenses, usually reflected in export sales to the Philippines, by producers in the country of export of goods of the same class or kind;
- d. Add the cost of transport, insurance and related charges to the port or place of importation.

G. Method 6 – The Fallback Value

When the dutiable value cannot be determined under any of the previous methods of valuation, it shall be determined by using other reasonable means consistent with the principles and general provisions of GATT 1994, the agreement on the implementation of Article VII of the General Agreement on Tariffs and Trade as contained in the Uruguay Round Final Act, and on the basis of data available in the Philippines.

If the importer so requests, he shall be informed in writing of the dutiable value determined under Method Six and method used to determine such value.

No dutiable shall be determined under Method Six on the basis of:

- 1. The selling price in the Philippines of goods produced in the Philippines;
 - 2. A system that provides for the acceptance for customs purposes of the higher of two alternative values;
 - 3. The price of goods in the domestic market of the country of exportation;
 - 4. The cost of production, other than computed values, that have been determined for identical or similar goods in accordance with Method Five hereof;
 - 5. The price of goods for export to a country other than the Philippines;
 - 6. Minimum customs values; or
 - 7. Arbitrary or fictitious values.
- H. Inability to accept or doubts as to the transaction value documents submitted by the importer at the time entry is filed / processed.
- 1. This section shall apply to import releasing procedures including tentative release under sufficient guarantee.
 - 2. Whenever the Bureau is unable to accept the transaction value or if has reason to doubt the truth or accuracy of the particulars or of documents produced in support of the import declaration, it should notify and give the importer the opportunity to provide further explanation. The Bureau shall communicate to the importer, in writing if requested, its grounds for doubting the truth or accuracy of

c&6-4-04f

the particulars or documents produced and give the importer a reasonable opportunity to respond.

3. If, after receiving further information, or in the absence of a response from the importer, the Bureau still has reasonable doubts about the truth or accuracy of the declared value, then it is deemed that the customs value of imported goods cannot be determined under Method One. The Bureau shall then proceed to determine the dutiable value under alternative methods sequentially and in the order of succession as provided by law.
4. Upon written request, the importer shall have the right to an explanation in writing from the Bureau as to how the customs value of the importer's goods was determined. When a final decision is made, the Bureau shall communicate to the importer in writing its decision and the grounds therefor.
5. The above procedure is without prejudice to an importer's right to appeal pursuant to Article 11 of the WTO Agreement on Customs Valuation.

SEC. III. ADMINISTRATIVE PROVISIONS

A. Reference Value as Risk Management Tool

Published or established customs value, or any other value reference from whatever source, cannot be used as substitute value for customs valuation. However, such value information may be used as a risk management tool to establish doubt or to alert customs to do a value verification check either upfront thru a system created for the purpose or on a post entry basis through the Post Entry Audit infrastructure.

B. Currency Conversion

Where the conversion of currency is necessary for the determination of the dutiable value, the rate of exchange to be used shall be that duly published by the *Bangko Sentral ng Pilipinas* and shall reflect as effectively as possible, in respect of the period covered by each such document of publication, the current value of such currency in commercial transactions in terms of the currency of the Philippines.

The conversion rate to be used shall be that in effect as provided for in Customs Memorandum Order No. 24-95.

C. Release Under Sufficient Guarantees

If in the course of determining the dutiable value of imported goods, delay will necessarily ensue in the final determination of such dutiable value, the importer may secure the release of the imported goods from Customs provided

RAO-4-34

1. The importer pays the duties and taxes due based on his declaration; and
2. The importer puts up a sufficient guarantee in such form as will be determined by the Commissioner of Customs in an appropriate regulation and in an amount equivalent to the additional duties and taxes due, computed by Customs using the alternative methods sequentially and in the order of succession as provided by law, to be approved by the Collector of Customs concerned.
3. Provided, however, that goods, the importation of which is prohibited by law shall not be released under any circumstance whatsoever.

D. Appeals

Importers who are not satisfied with the dutiable value determined by Customs could file an appeal in the form of a formal protest pursuant to Section 2308 of the Customs Code within fifteen (15) days from date of additional duties and taxes are paid or collected from the guaranty posted, and upon payment of the appropriate docket fee required under existing regulations.

E. Finality of Liquidation of Import Entries

The liquidation of an import entry shall be deemed final and conclusive upon all parties after the expiration of three (3) years from the date of the final payment of the duties due, except where:

1. Fraud as defined in Section VI.C.1.c hereof as committed;
2. A protest has been filed under the provision of Section 2308 of the Customs Code;

App. 1b.D

- a) The document flow;
- b) Financial flow;
- c) Goods inventory; and
- d) Other business processes

necessary or relevant in determining the adequacy and integrity of the manual or electronic system or systems by which such records are created and stored and to ensure compliance with customs laws and existing rules and regulations, particularly in relation to customs valuation, tariff classification, and country of origin with the end in view of collecting the proper duties and taxes.

2. In addition, the authorized customs officer may require the importer and/or broker to make certified copies of any such documents or extracts thereof.
3. A copy of any such document certified by or on behalf of the importer/broker is admissible in evidence in all courts as if it were the original.
4. An authorized customs officer shall not enter any premises under this Section unless, before so doing, the officer produces to the person in charge of the premises the following: 1) duplicate original of the AUDIT NOTIFICATION LETTER (ANL) issued by the Commissioner of Customs addressed to the importer/broker, and 2) official Customs identification card. The person in charge of the premises entered by an officer shall provide the officer with all reasonable facilities and assistance for the effective exercise of powers under this Section.
5. No audit shall commence without the issuance by the Commissioner of Customs of an ANL.
6. Unless otherwise provided herein or in other provisions of law, the Bureau of Customs may, in case of disobedience, invoke the aid of the proper regional trial court within whose jurisdiction the matter falls. The court may punish contumacy or refusal as contempt. In addition, the fact that the importer/broker denies the authorized customs officer full and free access to importation records during the conduct of a post-entry audit shall create a presumption of inaccuracy in the transaction value declared for their imported goods and constitute grounds for the Bureau of Customs to conduct a re-assessment of such goods using the alternate methods of valuation as applicable.
7. This is without prejudice to the criminal sanctions imposed by laws and administrative sanctions that the Bureau of Customs may

LAO-4-04

impose against continuous importers under existing laws and regulations including the authority to hold delivery or release of their imported articles.

C. Scope of the Compliance Audit

1. The audit of importers shall be undertaken:
 - a. When firms are selected by a computer-aided risk management system, the parameters of which are to be based on objective and quantifiable data which shall include, but not be limited to, the following
 - 1) Relative magnitude of customs revenue from the firm;
 - 2) The rates of duties of the firm's imports;
 - 3) The compliance track record of the firm, and
 - 4) An assessment of the risk to revenue of the firm's import activities;
 - b. When errors in the import declaration are detected which if uncorrected would result in substantial revenue loss or grave distortion of relevant statistical data;
 - c. When firms voluntarily request to be audited, subject to the approval of the Commissioner of Customs.
2. Brokers shall be audited only to validate audits of their importer clients and/or fill in information gaps revealed during an audit of their importer clients

D. Conduct of Compliance Audit

1. The Commissioner of Customs shall prepare a set of compliance audit guidelines, e.g. manual, to strictly govern the audit system and procedure as well as the conduct of the audit examination itself to achieve the highest level of objectivity and fairness, efficiency, and transparency. The guideline/manual shall include the following procedural/operational concerns:
 - a. Profiling/Information Analysis
 - b. Audit Notification
 - c. Audit Preparation / Audit Plan
 - d. Pre Audit Conference with Auditee
 - e. Conduct of Audit Proper
 - f. Exit Conference
 - g. Audit Reporting

efc-14-04

b. Audit Monitoring

2. The conduct of compliance audit shall depend on prevailing circumstances. The audit may be divided into stages or may have varying scopes. Initially, the Importer shall be required to produce for examination documents enumerated under Section IV A 2 (a), (b) and (c). The audit may be expanded to cover documents enumerated under Section IV A 2 (d), (e), (f), and (g).
3. Nothing in this section shall be construed as restricting or calling into question the rights of the Bureau to satisfy itself as to the truth or accuracy of any statement, document or declaration presented for customs valuation purposes, and as may be necessary for the purpose of collecting the proper duties and taxes.

SEC. V. COMPULSORY ACQUISITION

In order to protect the Government's revenues against the undervaluation of goods subject to ad valorem duty, the Commissioner of Customs may acquire grossly undervalued goods for a price equal to their declared Customs value plus any duties already paid on the goods, payment for which shall be made within ten (10) working days from issuance of a warrant signed by the Commissioner of Customs for the acquisition of such goods. For this purpose, there is gross undervaluation when the discrepancy between the declared Customs value and any of the test values sequentially applied in accordance with law as enumerated in Section II.B paragraph I 2.1. to iii hereof is two hundred percent (200%) or higher using the following formula:

$$= \frac{\text{difference between test value and declared value}}{\text{declared value}} \times 100$$

and that the importer fails to satisfactorily explain or justify the difference between the declared value and the test value as resulting from an arms length transaction
