MEMORANDUM

TO : All District/Port Collectors
And Others Concerned

SUBJECT : March 2014 Market Status of White Rice

DATE : November 7, 2014

Attached is a copy of the Collective Report issued to SGS Government & Institutions Services on March 2014 Market Status of White Rice (Fragrant Rice, Long Grain White Rice and Parboiled Rice) originating from Thailand, Vietnam, India and Pakistan.

For your information and guidance.

Please confirm the dissemination of this memorandum throughout your office within fifteen (15) days from receipt hereof.

ARNULFO B. GAMBAYAN
Acting Director
Imports and Assessment Service

White Rice

MARCH 2014

<u>Products</u>	<u>Origin</u>	<u>Specifications</u>
1. Fragrant Rice	Thailand, Vietnam	Hom Mali 100% A, Pathumthani Fragrant, Jasmine fragrant
2. Long Grain White Rice	Thailand, India, Vietnam, Pakistan	5% broken, 25% broken , Thai 100% B
3. Parboiled Rice	Thailand, India	Thai Parboiled 100%, Indian Parboiled 5%

Background information

Rice is a common name for the genus *Oryza*. It is one of the oldest cultivated crops and is a staple food for majority of the world's population especially those living in Southern and Eastern Asia. **Paddy Rice** – or rough rice is rice that has been harvested and threshed but not yet dehusked.

Brown Rice – dehusked rice with the bran left clinging to the grains. It is also known as Cargo Rice or Husked Rice. Because of the bran, brown rice contains more nutrients than white rice.

White Rice – rice obtained after milling of Brown Rice. Milling involves removing the outer bran layers in the grain which are darker in color. It is often referred to as rice that is polished or fully milled because husk and the bran are fully removed from the kernel. Most common grades for this rice is White Rice 5%, White Rice 25%, White Rice 100% B

Parboiled Rice – non-glutinous rice that has passed through the parboiling process and has its bran removed. Most common grades for this rice are Parboiled rice 100% sortexed, Parboiled rice 5%.

Hom Mali Rice – is fragrant rice known for its aroma, flavor and distinctive texture. This type of rice is a specialty of Thailand and is planted and harvested only once a year from September to December. It is also known as Jasmine Rice or Thai Fragrant Rice. Commonly exported grades of Hom Mali rice are Hom Mali rice 100% A, Hom Mali Rice 100% B, Hom Mali rice 100% broken A1 Super and Mixed Thai Hom Mali rice 80/20.

Pathumthani Fragrant Rice – is fragrant rice that is developed recently by the Pathumthani Rice Institute in Thailand as an alternative to Jasmine or Hom Mali rice. It is less sensitive to sunlight, has better yield and can be cultivated year round as opposed to Hom Mali which can only be harvested once a year. It has a similar appearance with Hom Mali rice but less fragrant and shiny and is relatively cheaper.

Old Crop Rice

Rice crop of the previous crop year (“one-year old” rice) is generally more expensive than the current crop. There is more demand for this kind of rice as they generally give better taste.

Rice older than the previous crop year is mostly government stock which was kept for a long time and is considered inferior in qualities. Generally, the rice is already yellowish in appearance, with stock smell or with black, damaged kernels. Prices may vary depending on quality and negotiations between parties but are estimated to be **USD 40-70/ MT** lower than current crop price.

March 2014 Market status**Global**

The International Grain Council (IGC) on its March 2014 report on rice projects an increase in 2013/14 global rice production from 473.2 million tons in February to 473.6 million tons this March. The increase was attributed to a rise in production in Brazil and China. Global trade is also projected at 38.7 million tons, up from the February estimate of 38.5 million tons. Higher projection is due to expectations of greater import demand from China, the Philippines and Indonesia in Asia, as well as Nigeria and Cameroon in Africa.

Thailand

Thailand fears the implementation of free trade agreements under the ASEAN Economic Community (AEC) would provide greater competition on their Hom Mali fragrant rice against fragrant rice from other producing countries in Asia.

The AEC, which is set to be formed by late 2015, aims to better integrate ASEAN economies thru free movements of goods, services, labor, investments and capital among its members could result to an influx of cheaper fragrant rice from Cambodia and other neighboring countries. In view with this, the Thai Rice Exporters Association (TREA) has called on Thai rice producers to step up their efforts and develop rice varieties especially on Thai Hommali rice which is said to have declined in quality over the last three years. It further warned that local farmers should stop mixing the cheaper Pathumthani fragrant rice variety with the more expensive Hommali.

AEC, on the one hand, would also provide opportunities for Thai rice millers to set up operations in Cambodia (which compared to Thailand still lacks more sophisticated rice mills) and take advantage of the cheaper production costs in the country.

Iraq lifted its ban on Thai rice imports and will now allow Thailand to participate in upcoming tenders. This is after the country sent its representatives to Iraq to persuade the government to renew trade. Iraq is the second largest buyer of Thai rice in 2013 but recently stopped buying from Thailand on complaints over the quality and weight of rice imported.

Vietnam

The Philippines is scheduled to purchase 800,000 tons of 15% broken white rice via open tender on April 15. Vietnam is expected to win the bulk of this tender with speculations that Vietnam will be lowering its minimum export price (MEP) on 25% rice in order to win this tender.

Vietnam exported about 859,119 tons of rice from January 1 to March 20, 2014. This figure is about 41% below the volume exported in the first quarter of 2013.

India

India exported around USD5.6 billion of rice from April to December 2013. Rice exports are forecast to increase by about 21% to reach around USD7.5 Billion in the full fiscal year 2013-14 (April- March) from previous year's (FY2012-13) USD 6.21 Billion. The Middle East remains India's biggest buyers with Iran and Saudi Arabia taking up the biggest share.

The country however lost its position as the number 1 exporter of rice to Thailand after the collapse of the Thai government's rice scheme pulling Thai rice prices downwards and prompting sell-out of cheaper rice in the market.

Pakistan

There were some slight concerns that exporters might lose their market share to competitor India due to continued strengthening of the Pakistan rupee against the US Dollar. Nevertheless, the market is seen as generally quiet and unchanged as exporters continue to rely on East Africa and border trade with China for their rice exports.

Reference Price information Summary for March 2014

Transactional References

The following are verified transactional references to Africa this March.

Description	Unit Price FOB
White Rice Loing Grain 5% broken, Thailand origin, Crop 2011-2012, Ceyo brand, 50 kg bag	Eur 308 -312/ MT (US\$ 424 - 430/MT)
White Rice Loing Grain 5% broken, Thailand origin, Neima brand, 50 kg bag	Eur 318.50/ MT (US\$ 439/ MT)
White Rice Long Grain 25% broken, Pakistan origin, 50 kg bag	Eur 263.67/ MT (US\$ 362/ MT)

Non- Transactional References

The following are **March** average prices as sourced from various price publications, ie. Oryza.com, Creed Rice Co Market Reports, Thailand Rice Exporters Association (TREA) website and USDA FAS GAIN Reports.

A Minimum Price from these references is also indicated. Premiums are applicable to special packing as per next section.
