**Topic: Certificate of Origin (CO) verification website
 ICC WCF International CO Accreditation Chain**

The ICC World Chambers Federation (WCF) International CO Accreditation Chain has now been in operation since September 2012.

Based on the International CO Guidelines, the Chain entitles joining Chambers to use the instantly identifiable international ICC WCF CO quality label on CO forms. This label recognizes that chambers follow transparent and responsible procedures in issuing COs. The Chain reinforces the unique position of Chambers as competent and trusted third parties in the delivery of CO.

Please find attached to this letter the full list of accredited chambers to date, that have implemented the CO Label on their CO forms.

In support of this service, ICC WCF has developed a secured online verification website which has been operational since January 2014. The site offers Customs authorities a centralized portal to verify the authenticity of COs issued by participating chambers. Entering the unique CO number as well as the chamber's accreditation number online will give immediate access to the CO basic references, date of issuance and name of the applying company. Customs and Chambers immediately know if a CO is or not issued by a participating chamber.

4 advantages of CO Verification Website

The CO Verification website provides Customs authorities and Chambers a global platform to easily verify and check the authenticity of COs and underlies the importance of eCO delivery and recognition by Chambers and other authorities.

1

ACCREDITATION

Provided to CO Accreditation Chain members, the CO online verification website reinforces the internationally accepted standards established by the International CO Guidelines.

2

SECURITY

To guarantee the authenticity of the CO information, only Chambers and their technical providers are allowed to transfer CO information to the global platform.

certificates.iccwbo.org

The CO Verification website allows Customs authorities, embassies and any other bodies involved in the CO verification process to check the authenticity of the CO information online before as well as on the arrival of goods.

Automatically transferred data from Chambers is uploaded daily on the CO Verification website. The information includes the CO number, date of issuance and name of CO consignor.
