

BOC-03-04437

MEMORANDUM

TO : ALL BOC OFFICIALS AND EMPLOYEES

FROM : REY LEONARDO B. GUERRERO
Commissioner *JAN 28 2020*

SUBJECT : PERFORMANCE GOVERNANCE SYSTEM ONLINE TEST

DATE : January 23, 2020

1. In connection with the 2nd Stage of the Performance Governance System (PGS), which is Compliance Stage, all BOC personnel, to include casuals, are required to take the Online PGS Test and will be given **three attempts** to pass.
2. All personnel are expected to be familiar with the BOC-Level Governance Documents and the 9 Elements of the Performance Governance System (PGS), which have already been cascaded to your respective offices/ports and widely disseminated during and after the Initiation Stage.
3. Failure to pass the Online PGS Test after the third attempt will require the concerned BOC personnel to undergo a refresher course. Results of the test will form part of Personnel Records/Files.
4. Likewise, a reviewer for the test will be provided by e-mail. In this regard, all BOC personnel and casuals are required to submit their respective email addresses to **paolo1123dejesus@gmail.com** by **Jan 31, 2020**.

Non-submission of your respective email addresses will result to the issuance of a show cause order.
5. Attached is the Schedule of Online Tests ("**Annex A**") and review materials ("**Annex B**") for your guidance.
6. **FOR STRICT COMPLIANCE.**

Faint, illegible text or stamp at the bottom of the page.

3rd STAGE: PROFICIENCY

- Focuses on monitoring and evaluation of the strategy

9

4th STAGE: INSTITUTIONALIZATION

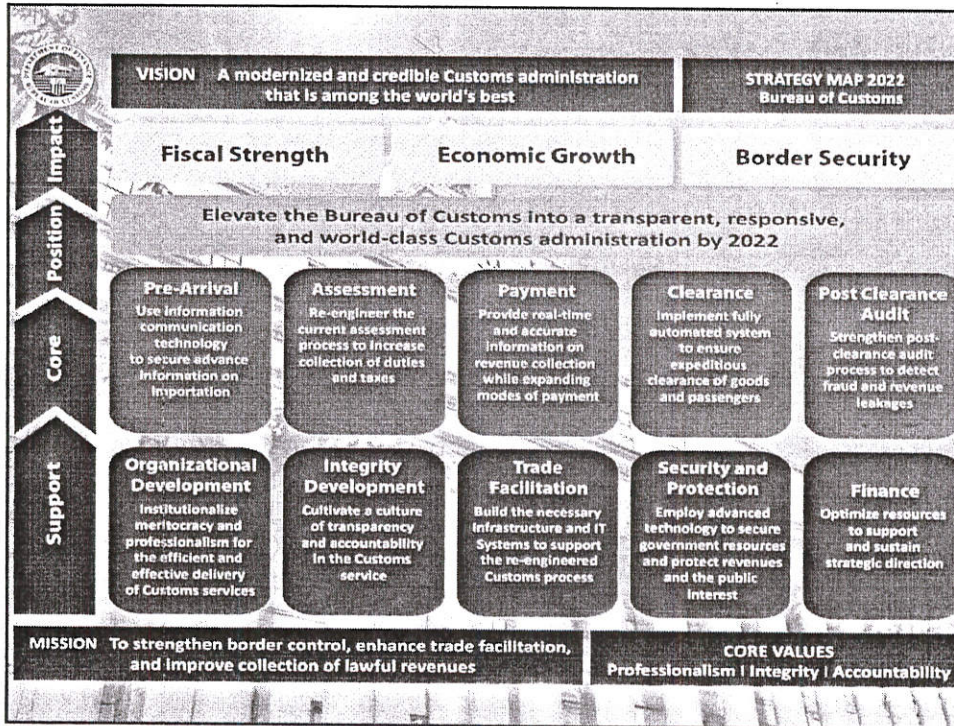

- Focuses on the attainment of breakthrough results

10

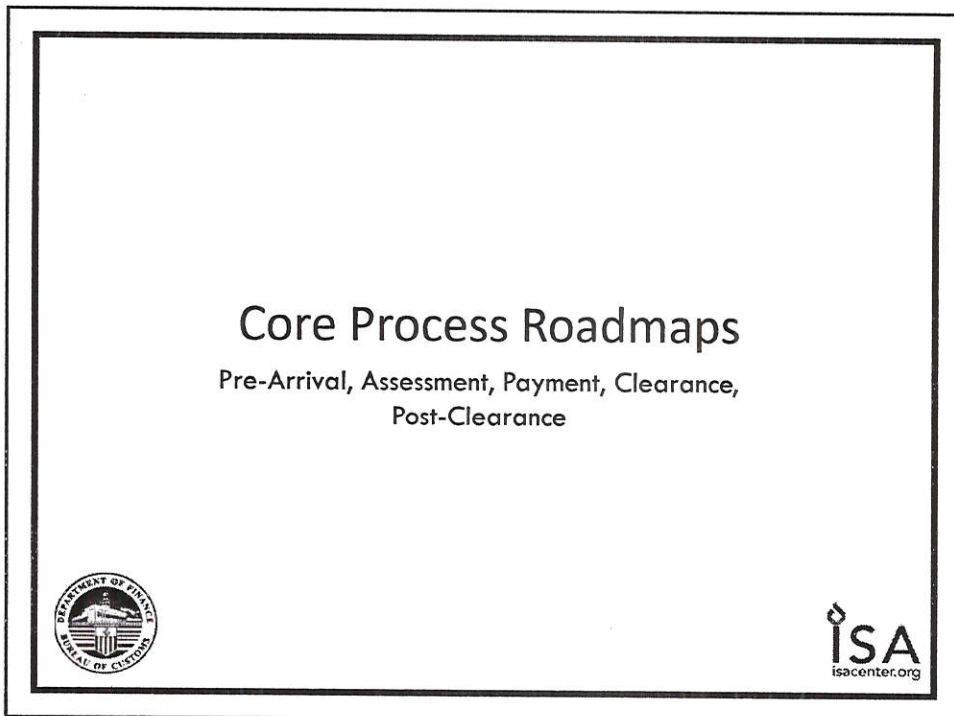

ELEMENTS OF THE PERFORMANCE GOVERNANCE SYSTEM

Before an organization is conferred into the four-stage PGS Pathway, it must embed the following essential governance elements:

1. **Basic Governance Documents** – Identifying a path towards transformation through a well-formulated Charter Statement, Strategy Map, and Enterprise Scorecard – all anchored on a strategic positioning.
2. **PGS Core Team** – Establishing a group of PGS champions representing strategic areas and operating units of the organization who will spur the execution of the strategy, rally for performance results, and actively supervise the progress of the organization.
3. **Cascading Framework** – Instilling a culture founded on a shared responsibility and accountability to the organization's strategy through a rationalized cascading tool harmonized to its day-to-day operations. Under the PGS, scorecards, scoreboards, or execution plans are used to cascade and eventually monitor the strategic contributions of units and individuals.
4. **Office for Strategy Management (OSM)** – Forming a unit created purposely for overseeing strategy design, strategy execution, and strategy sustainability. The identified OSM members must assist in cascading the strategy to strategic units and/or project teams. The OSM should also start monitoring the strategy and planning how it can align its budget to the strategy.
5. **Strategic Performance Assessments (SPA)** – Creating a discipline of accountability within the organization to reinforce the PGS. Through regular and competent monitoring and evaluation, operations and functions of the different units of the organization are being closely monitored to ensure effectiveness. Execution plans and second-level scorecards or scoreboards must be valuated through an operations review.
6. **Multi-Sector Governance Council (MSGC)** – Founding a council of key stakeholders to formalize their participation in the organization's strategy. More than providing strategic and substantive advice to move the organization forward in its governance journey, MSGC members are expected to attend regular meetings, work within their committees, and have targeted contributions for the attainment of the strategic goals. For Compliance, the MSGC should be formally created and meet at least once to gather initial inputs and recommendations to the strategy.
7. **Governance Culture** – Cultivating the values of integrity, fairness, and accountability to create a culture of good governance in the organization. Components of this element include creating plans for linking the budget and the incentives or promotion program to the strategy, having a clear and consistent communication strategy, and the presence of commitment from the leadership team.
8. **Governance Sharing** – Sharing the good governance advocacy through identifying and sharing best practices within the organization and extending these to other institutions and organizations. Through the chosen cascading framework, the organization must begin evaluating the best practices in the different units.
9. **Validated Breakthrough Results** – Mission-related, influenced by the organization, and truly transformative. The organization must be able to demonstrate their monitoring of the strategy, including its chosen impact indicators.

2

PRE-ARRIVAL ROADMAP				
Use information communication technology to secure advance information on importers and goods		Shorten processing time for accreditation		
		Decrease in number of non-compliant stakeholders		
KRA	DELIVERABLES			
	2019	2020	2021	2022
Accreditation	Audit report on flaws in accreditation procedures Online submission of application	Online Accreditation System Regulations on reengineered accreditation procedures issued and implemented MOA on National Single Window System with identified partner government agencies	Automated Accreditation System integrated with identified partner government agencies	
Risk Management	Cargo Targeting System Audit report on flaws in Risk Management procedures	Cargo Targeting System to include Air Manifest New E2M Advanced Risk Management System Regulations to re-engineer risk management procedures issued and implemented to provide clearer parameters on selectivity system and establish an audit trail	Risk Management System integrated with Cargo Targeting System	Analytics-based Risk Management System
Licensing & Clearance	CMO on Permit Claiming and Utilization	Pilot Implementation of Trade Net Licensing and Clearance with 5 pilot agencies Electronic Certificate of Origin Live Exchange with ASW	Integration and Licensing & Clearance with the Trade Net Portal	Full utilization of Trade Net Portal

3

ASSESSMENT ROADMAP				
Re-engineer the current assessment process to increase collection of duties and taxes		Decrease in number of fraudulent transactions (forfeitures, alerts, and cases filed)		
		Collection Efficiency		
KRA	DELIVERABLES			
	2019	2020	2021	2022
Rules on Specific Description of Goods	Audit report on goods declaration procedures	Regulations to enhance goods declaration procedures to prevent misdescription and misclassification of goods issued implemented Enhanced selectivity rules/criteria for goods description Proposed design for automated alphabetical index of goods	Approved design and budget for re-engineered goods declaration procedures Approved design and budget for automated alphabetical index of goods	Functional re-engineered goods declaration system integrated to the customs automated system Functional alphabetical index of goods integrated to the customs automated system
Examination & Inspection	Audit report on examination & inspection procedures	Regulations to re-engineer examination & inspection procedures to ensure check and balance and prevent familiarity with stakeholders issued and implemented	Functional and separate Physical Examination Unit with body cameras and gadgets linked to a recording system	X-ray image integrated into the examiner's dashboard and the customs automated system
Value Reference System	Policy on the harmonization of the National Value Verification System (NVVS) and the Value Reference Information System (VRIS)	Enhanced Value Reference System Fully Functional Product-based Value Reference System		
Application of Rules of Origin	Policy mandating use of Electronic Certificate of Origin when applicable	Bilateral agreement with other countries on the electronic transmittal of certificate of origin	Functional system for the viewing and verification of electronic certificate of origin integrated to the customs automated system	

4

PAYMENT ROADMAP				
Provide real-time and accurate information on revenue collection while expanding modes of payment			Decrease in number of unreconciled collection reports of BOC and BT	
KRA	DELIVERABLES			
	2019	2020	2021	2022
Enhanced Automated Payment System	Utilization of Cash SAD and Cash Miscellaneous System Module	Establishment of online payment system for miscellaneous transactions Utilization of Informal Entry System Module for informal commercial transactions	Expansion of other modes of payment to cover all transactions (i.e. e-commerce de minimis)	Additional module for payment system of changed import process Interconnectivity with other collection agents on payment system
Policy Support	Feasibility Study on an enhanced BOC Payment System enabling payment in all financial institutions	Regulations on enhanced BOC Payment System MOAs with other banking institutions for the enhanced BOC Payment System	Approved design for the BOC Payment System integrated into the Customs Automated System	Functional enhanced BOC Payment System integrated into the Customs Automated System

5

CLEARANCE ROADMAP					
Implement fully automated system to ensure expeditious clearance of goods and passengers			Increase volume of dutiable/taxable goods Decrease violations of CMTA and related laws Shorten Clearance Period from Lodgment to DLRS		
KRA	DELIVERABLES				
	2019	2020	2021	2022	
Consumption	Formal	Audit report on flaws in clearance procedures Regulations to enhance clearance procedures to prevent fraud and compliant with international standards	Regulations to enhance clearance procedures implemented	Approved design and budget for the integration of x-ray scanners to the automated system	Functional hardware and software for the integration of x-ray scanners to the automated system
	Informal	Audit report on flaws in clearance procedures	Regulations to enhance informal entry clearance procedures to prevent fraud and compliant with international standards	Approved design and budget for the automated clearance system	Regulations to enhance clearance procedures implemented Functional clearance system integrated to the customs automated system
	Postal	Procedures on the clearance process issued Functional Postal Tracking System	Proposed design for the automated clearance system integrated to the postal tracking system	Approved design and budget for the automated clearance system	Functional clearance system integrated to the customs automated system
	Express shipment	Amended regulations on the clearance process issued	Amended regulations on the clearance process implemented Proposed design for the automated express shipment clearance system	Approved design and budget for the automated express shipment clearance system	Functional express shipment clearance system integrated to the customs automated system
Passenger	Parameters for a customized Advance Passenger Information System and Passenger Name Records	Issuance of a directive to Airlines and Shipping Lines to comply with Passenger Data Submission Systems	Approved design and budget for the integration of customized APIS and PNR with airlines system	Functional customized APIS and PNR integrated with airline system	

6

POST-CLEARANCE AUDIT ROADMAP				
KRA	Strengthen post-clearance audit process to detect fraud and revenue leakages		Increase amount of lost revenue recovered	
			Improve compliance rate of Stakeholders	
	DELIVERABLES			
	2019	2020	2021	2022
Audit Systems	<p>Regulations for Account-based Audit</p> <p>Proposed design for a Computer-aided risk Analysis system for audit</p>	<p>Regulations and Procedures for Transaction Audit and Account-based Audit</p> <p>Approved design for Computer-Aided Risk Analysis Targeting System for audit</p>	<p>Approved budget for the Computer-Aided Risk Analysis Targeting System for audit</p>	<p>Functional Computer-Aided Risk Analysis Targeting System to include data analytics and machine learning integrated to the Customs Automated System</p>
