**SUBJECT :** Implementation of the Automated Bonds Management System for Transit bond

**DATE :** 15 February 2021

In line with the implementation of the General Transport Bond thru the Automated Bonds Management System (ABMS) on 01 February 2021, we would like to inform our Stakeholders that all electronically lodged Transit goods declaration must have an approved bond policy in the E2M-ABMS starting 01 March 2021. Only the approved bond policy can be used on the Terms of Payment (TOP) upon filing of the Transit Single Administrative Document (TSAD) in the E2M system.

Please be reminded that approved transit bond policy can be applied to multiple electronically lodged Transit goods declaration as long as the bond policy has sufficient funds or available balance.

The authorized Customs Officer shall tag all Transit shipments as "Arrived" in the E2M System. Once the tagging is done, the E2M-ABMS will automatically revert the amount charged to the original balance.

For your information and guidance.
