## MASTERS IN PUBLIC SAFETY ADMINISTRATION

### Rationale:

The Master in Public Safety Administration is a capstone program administered by the Philippine Public Safety College (PPSC) based on Section 66 of Republic Act 6975, otherwise known as the "Department of Interior and Local Government (DILG) Act of 1990", which mandated PPSC to serve as the premier educational institution for the training, human resource development and continuing education of all personnel of the Philippine National Police (PNP), the Bureau of Fire Protection (BFP) and the Bureau of Jail Management and Penology (BJMP). The DILG Act of 1990 mandates PPSC to provide policy, structural, operational, and professional development framework for the public safety sector and its uniformed personnel. PPSC Masteral Program is with the full concurrence and cognizance of the Commission on Higher Education.

In line with the concept development of the Philippine Public Safety College (PPSC) to mainstream public safety in national security, we are also currently reviving the PPSC's flagship academic program—the **Master in Public Safety Administration** or the MPSA as a distinct field of study.

The revival of the MPSA—as-a prestigious graduate program for senior public safety officers, government officials, and other intellectuals—is wanting for us to sustain the momentum of professionalizing this multi-sectoral and non-military component of national security.

### Objectives

1. Prepare the next generation of public safety and homeland security administrators and leaders by deepening and expanding their outlook on the global and ever changing nature, sources and responses to public safety and security issues and concerns

2011-05-021 P-8

2. Transcend boundaries of traditional public safety approaches in addressing the 21<sup>st</sup> century security and governance challenges by adopting a cross border, systemic, all hazards/all-threats, transnational and practical orientation and perspective.
3. Incorporates and integrates theoretical and practical studies of the key subfields of public safety and security as they are applicable to the growing needs of Homeland and Transnational Security.
4. Develop and introduce Innovative and forward-thinking strategies, plans and programs that build on the capacity of institutions and international cooperation mechanisms to address long term improvements on vulnerability and hazards preparedness
5. Hone the knowledge and skills set that enables senior government officials and public safety leaders to design, implement, and evaluate security-related strategies, policies, and plans at any level of government, nation and the world.
